*Stephen,*

*Thank you for introducing me to the "Ice Cold " refrigerant treatment for my air conditioning system.*

*This product really dose what you said it would do, after installing the Ice Cold this June in our units, we have experienced a much cooler air coming out of our AC units than before, even though this year has been much hotter than last year we were able to keep our dinning area cool all day long and keep our customers happy not complaining about the heat.*

*Thank you again for this product and I'm looking forward to see your other recommendation on reducing the electrical demand so we may lower the cost of our restaurant operation.*

*Truly,*

*Mike Tibi*
